WORK EXPERIENCE

Frontend Developer Intern

2024

AI-Driven Web Applications

- Designed and developed AI-integrated web applications with responsive, user-centric interfaces using React.js.
- Implemented backend optimizations and API integrations that improved overall system efficiency and performance by **25%**.
- Collaborated cross-functionally to deliver features on schedule within an agile development workflow.

PROJECTS

Autonomous JARVIS Legion — Multi-Agent System

🔗 github.com/rishikabaggi-hue/sravani

Python Vision AI Swarm Intelligence LLMs PyAutoGUI

- Engineered a scalable multi-agent system capable of parallel task execution and distributed web scraping using specialized bot archetypes.
- Developed a central JARVIS core that utilizes screen vision and intelligent decision-making for fully autonomous GUI control and system interaction.
- Implemented a modular orchestration layer with a 'Commander' for mission objectives and a 'Factory' for dynamic agent scaling and lifecycle management.
- Optimized swarm coordination and shared memory pools, enabling efficient execution of complex, multi-step automated workflows.

EDUCATION

B.Tech — Computer Engineering

Malla Reddy College of Engineering

2023 – 2027 (Expected)

TECHNICAL SKILLS

Python

Java

React.js

Next.js

HTML / CSS

JavaScript

Flask

Firebase

Gemini API

REST APIs

MySQL

AI / ML

Git & GitHub

Automation

Pandas

CERTIFICATIONS

AI Foundations Certificate

NASSCOM / Coursera · 2024

Python Programming Workshop

Malla Reddy College · 2023

React — Front End Development

Meta / Coursera

Machine Learning Specialization

DeepLearning.AI / Coursera

ACTIVITIES & INVOLVEMENT

- Built a public and private real-time chat platform with React, Node.js, Express, Socket.IO, MongoDB, JWT auth, and role-based access control.
- Implemented secure registration and login flows with bcrypt password hashing, protected routes, and token-based session handling.
- Developed topic-based public rooms with real-time group messaging, room search and filtering, temporary room expiry, and anonymous participation.
- Enabled private messaging through accepted chat requests, adding safer direct conversations and anti-spam controls across the platform.
- Shipped role-based controls for admin, moderator, member, and observer workflows, covering muting, pinning, joining, blocking, and room management.
